ABOUT ME

As a member of the Student Representative Council of the Faculty of Mechanical Engineering, I actively support student interests and promote collaboration between academia, industry, and research. Through my work at GMV, I contributed to ESA initiatives such as RNMD4SSC using the L3Harris Wescam MX and VR-Forces simulation systems, gaining valuable experience in aerospace and defense technologies.

My academic journey is intentionally interdisciplinary and international. I began my studies in Mechanical Engineering at Mannheim University of Applied Sciences before expanding my expertise in Mechatronics and the international Engineering and Management (EMB) program, which combines engineering principles with business and management competencies. In parallel, I have pursued studies in Data Science at SRH University and participated in academic activities at SRM Institute of Science and Technology in Chennai. By integrating engineering, data analytics, and technology management, I aim to develop innovative solutions for complex challenges in the aerospace sector and other technology-driven industries.
